

Methodology

This survey was sponsored by a client and conducted by Forum Research, with the results based on an interactive voice response telephone survey of 1281 randomly selected Canadian Voters. The poll was conducted November 4-6, 2017.

Results based on the total sample are considered accurate +/- 3%, 19 times out of 20. Subsample results will be less accurate. Margins of error for subsample (such as age, gender) results are available at www.forumresearch.com/samplestim.asp

Where appropriate, the data has been statistically weighted by age, region, and other variables to ensure that the sample reflects the actual population according to the latest Census data.

This research is not necessarily predictive of future outcomes, but rather, captures opinion at one point in time. Forum houses its poll results in the Data Library of the Department of Political Science at the University of Toronto.

With offices across Canada and around the world, 100% Canadian-owned Forum Research is one of the country's leading survey research firms.

Global Warming is caused primarily by the burning of fossil fuels
