

## **Almost Half of Ontarians Support Carbon Pricing, Even if Costs Go Up**

Toronto, ON, February 27<sup>th</sup>, 2018 – In a random sampling of public opinion taken by Forum Research, on behalf of Canadians for Clean Prosperity, amongst 1005 Ontario voters,

Almost half (TOP2: 46%) of Ontarians supports having a price on carbon emissions, even if it makes some things more expensive. Just under a third (BTM2: 28%) say they would oppose a price on carbon if it made some things more expensive.

About one-sixth (18%) say they would neither support nor oppose a carbon tax if it made some things more expensive, while about 1 in 10 say they do not know (8%).

Respondents most likely to say they support a price on carbon emissions, even if it makes some things more expensive include those aged 35-44 (50%) or 55-64 (49%), females (50%), the most wealthy (57%), with a post-graduate degree (54%), living in Northern Ontario (50%) or Toronto (48%), and supporting the Liberals (71%).

Respondents most likely to say that they oppose a price on carbon emissions if they make things more expensive include those aged 34 and younger (31%), 45-54 (29%) or 55-64 (28%), males (35%), earning \$40,000-\$60,000 (35%) or \$60,000-\$80,000 (32%), living in Southwestern Ontario (36%), and supporting the PCs (44%).

There is a stark contrast amongst leaning and core PC supporters. Amongst core supporters, the third (34%) of voters that say they are very likely to vote Progressive Conservative in the upcoming provincial election, only a quarter (TOP2: 28%) say they would support a price on carbon emissions if it made things more expensive, with about half (BTM2: 48%) saying they would oppose such a measure.

Conversely, amongst leaning voters, the sixth (16%) that say they somewhat likely to vote PC in the next provincial election, the opposite is true. About half (TOP2: 49%) say they would support a price on carbon emissions, even if it made some things more expensive, while a quarter (BTM2: 25%) say they would oppose it.

Amongst undecided voters, opinion is divided. One quarter (TOP2: 28%) would support carbon pricing, even if it made things more expensive, while a third (BTM2: 33%) say they would oppose it.

### ***Half of Ontarians say more should be done to limit climate change***

Half (51%) of Ontarians say the province should do more to limit climate change, while a quarter (26%) says the province should continue at its current level of support.

About one sixth (17%) says Ontario should do less, while fewer than 1 in 10 (7%) say they do not know.

Respondents most likely to say Ontario should do more include those aged 34 and younger (56%), females (60%), earning \$20,000-\$40,000 (54%), \$60,000-\$80,000 (53%), \$80,000-\$100,000 (52%), or the most wealthy (51%), those with a college/university degree (56%), living in Toronto (54%), the 905 (53%), or Northern Ontario (54%), and supporting the Green Party (80%).

Respondents most likely to say Ontario should do less include those aged 45-54 (19%), 55-64 (19%), or 65+ (20%), males (29%), the least wealthy (18%), earning \$20,000-\$40,000 (17%), \$40,000-\$60,000 (18%), or the most wealthy (17%), the least educated (25%), living in Eastern Ontario (21%) or Southwestern Ontario (20%), and supporting the Progressive Conservatives (29%).

While PC supporters are the most likely to say the government should do less, the plurality of PC supporters (34%) say the government should do more.

Amongst core and leaning PC supporters, once again a considerable difference is seen. When considering the support of core PC supporters, those very likely to vote PC in the next election, about one-third (29%) say that Ontario should do more to limit climate change, the same proportion (29%) says it should do about the same as now (29%), and another third (32%) said Ontario should do less.

Amongst leaning PC supporters, however, the data tells a different story. More than half (55%) say Ontario should do more to limit climate change. About one-third (29%) says Ontario should do about the same as now, while one-sixth (17%) says Ontario should do less.

Half of undecided voters (50%) say Ontario should do more to limit climate change. More than a third (37%) say Ontario should do about the same as now, while just 1 in 10 (10%) say Ontario should do less.

### ***Ontarians prefer a revenue neutral carbon tax to cap-and-trade or a Federal Carbon Tax.***

One-third (33%) said that Ontario should replace its current cap-and-trade system with a made-in-Ontario carbon tax, the proceeds of which would be used to reduce other taxes in Ontario.

2-in-10 (22%) said Ontario should keep its existing cap-and-trade system.

About one-sixth (15%) said Ontario should eliminate its existing cap-and-trade system and accept the Federal carbon tax instead.

One-third (30%) said they do not know.

Respondents most likely to support a made-in-Ontario carbon tax that is revenue neutral include those aged 34 and younger (40%), males (39%), earning \$40,000-\$60,000 (38%), with some college/university (40%), living in Eastern (37%) or Northern (37%) Ontario, and supporting the PCs (37%) or Greens (38%).

Respondents most likely to say Ontario should keep its existing cap-and-trade system include those aged 45-54 (28%), the most wealthy (28%), with a post-graduate-degree (28%), living in the 905 (27%) or Northern Ontario (24%), and supporting the Liberals (29%).

Respondents most likely to say Ontario should accept the Federal carbon tax include the least wealthy (19%), earning \$20,000-\$40,000 (17%), or the most wealthy (18%), and supporting the Green Party (26%).

Amongst core and leaning Progressive Conservative supporters, the plurality supports a revenue neutral carbon tax. Amongst core supporters, those very likely to support the PCs in the upcoming election, about 4 in 10 (39%) say they would support a carbon tax, the proceeds of which reduced other taxes in Ontario. 2 in 10 (21%) say Ontario should keep its existing cap-and-trade system, while about 1 in 10 (12%) say Ontario should accept the Federal carbon tax instead. About one quarter (28%) say they do not know.

Amongst leaning Progressive Conservative supporters, however, the differences are narrower. The plurality (30%) say the government should develop a carbon tax that is revenue neutral, while one-quarter (26%) says Ontario should keep the existing cap-and-trade system. 2 in 10 say Ontario should accept the Federal carbon tax. About one quarter (24%) say they do not know.

Amongst undecided voters the plurality (37%) indicates they are not sure which of the three options would be best. About one-quarter (28%) say the province should keep the existing cap-and-trade system, a similar proportion (23%) opts for a revenue neutral carbon tax, with 1 in 10 (12%) saying the province should accept the Federal carbon tax.

### ***Ford and Elliott lead amongst the public***

Doug Ford (18%) and Christine Elliott (17%) are the leadership candidates that received the most support from the public, with Patrick Brown (13%) and Caroline Mulroney (12%) just behind.

Few (3%) say they would support Tanya Granic Allen.

The plurality (37%) says they do not know which of the leaders they are most likely to vote for during a general election.

***Overall, PCs lead amongst Decided and leaning voters***

The Progressive Conservatives lead amongst decided and leaning voters by a comfortable margin, with almost half (46%) of Ontarians saying they would support the PCs if an election were held today.

One quarter (24%) say they would support the NDP and 2 in 10 (21%) say they would support the Liberals. 1 in 10 (7%) say they would support the Green Party, and few say they would support another party (2%).

“The Progressive Conservatives hold a considerable lead amongst decided and leaning voters,” said Dr. Lorne Bozinoff, President of Forum Research. “When probing the support of those leaning toward the PCs, however, we see many of these voters are highly engaged on the environment. They think Ontario should do more to limit climate change and they also support a price on carbon. This narrow band of leaning voters, while a smaller proportion of Progressive Conservative support overall, could make the difference between a slim minority and a majority for the party.”

**About Forum Research Inc.:**

Founded in 1993 and headquartered in the heart of downtown Toronto, 100% Canadian owned Forum Research Inc. is a unique market research firm that has conducted market and consumer research for a wide range of clients including Federal, Provincial, and Municipal governments, crown corporations, major telecommunications companies, and more.

With offices across Canada and around the world, Forum Research is one of the country’s leading survey research firms.

**FORUM**  
RESEARCH INC.

### **Methodology**

This survey was conducted by Forum Research on behalf of Canadians for Clean Prosperity.

The results are based on an interactive voice response telephone survey of 1005 randomly selected Ontario Voters. The poll was conducted February 22-23, 2018 and dialed using a mix of landlines and mobile phones.

Results based on the total sample are considered accurate +/- 3%, 19 times out of 20. Subsample results will be less accurate. Margins of error for subsample (such as age, gender) results are available at [www.forumresearch.com/samplestim.asp](http://www.forumresearch.com/samplestim.asp)

Where appropriate, the data has been statistically weighted by age, region, and other variables to ensure that the sample reflects the actual population according to the latest Census data.

### Approach to carbon

The federal government has announced that every province must put a price on carbon emissions. If a province does not have a carbon pricing system, the federal government will impose its own carbon tax instead. Ontario currently has a cap-and-trade system that makes industries pay for the carbon emissions they release into the atmosphere. Which of the following options best reflect your opinion on this?

### Age/Gender

%	Total	18-34	35-44	45-54	55-64	65+	Male	Female

Ontario should keep its existing cap-and-trade system in place	22	23	23	22	27	26	21	14
Ontario should replace its cap-and-trade system with a carbon tax that the province develops, where the money collected is used to reduce other taxes in Ontario	33	36	31	29	38	30	39	24
Ontario should eliminate its cap-and-trade system and accept the Federal Carbon Tax instead	15	14	15	17	10	19	12	16
Don't know	30	27	31	32	26	24	28	46

### Things getting more expensive

Overall, do you support, oppose, or neither support nor oppose Ontario having a price a carbon-emissions, even if it makes some things more expensive?
